

Self Contained triDart Valve

eDART is proud to present a self contained internal dart valve which just can be dropped into your installation, bolted down and has the distinct advantage of being pre assembled and calibrated prior to shipment to site. Recommended for tank depth of up to 2-metres, if tank is deeper then an iDart valve will be recommended.

Material of Construction

- Mild Steel bodywork
- Poly urethane and mounting bars
- Internal components made from wear resistant poly urethane (PU) protected, wetted parts including seat, plug and valve guides
- Shaft either stainless steel or PU protected

Standard Sizes

- 100mm to 1000mm
- eDart offers customisation to suit your needs and plant layout if required.

Options

- Supplied with or without an actuator
- Bias Spring Fail Closed, Fail Fixed or Double Acting Actuator Options
- Smart (HART, Profibus), Electro-Pneumatic (4-20mA), Pneumatic (20-100kPa) Positioner
- Please ask for modifications to suit your needs and plant layout

Features

- Self contained, “drop in“ style
- Control or On/Off applications
- Customisable design
- Full head guiding
- Anti-Rotation Device
- Stroke Indication

Applications

- Ideal for tanks up to 2-meters deep
- Smart splitter boxes
- Feed distribution boxes
- Small flotation machines
- Conditioner tanks
